GEO PRO by Rockwood

Geo Pro G14FK exterior and interior shots.

The Rockwood **Geo Pro** line of travel trailers are for those campers that value being environmentally conscious and have chosen to drive today's more fuel efficient "crossover" vehicles and smaller SUV's. With floor plans that weigh within the towing capacity of these type of vehicles, the Geo Pro combines a traditional approach with modern amenities to enhance your camping experience.

In step with Rockwood's tradition of providing unsurpassed value and functionality, most Geo Pro models have a 78" interior height from the front to rear, roof mount 13,500 BTU low profile A/C and a permanently mounted manual awing or optional power awning available for quick and easy set up.

The Geo Pro has gone to the next level with its refreshing two tone fiberglass exterior, modern touches like LED exterior lights, available roof mount flexible solar panel system, and distinctive décors with Euro style cabinets. **The Geo Pro....** an exciting new way to go camping with the vehicle you drive every day.
